

Rubber Dam System

For safer and more efficient
endodontic treatments!

DENTSPLY
MAILLEFER

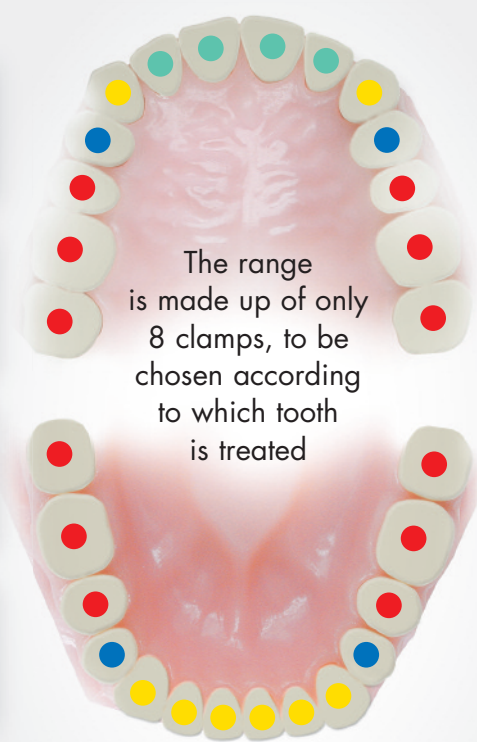

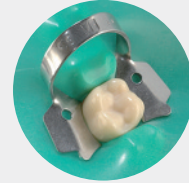

Dentsply Maillefer has developed a simple Rubber Dam system, with a number of items limited in order to enable you to work:

MORE EFFICIENTLY

- Improved visibility
- Saves time (the use of cotton pellets or holding back the patient's tongue are no longer needed)

MORE SAFELY

- Easier to maintain asepsis during the treatment
- Reduces the risk of the patient swallowing instruments and irrigating solutions

The range is made up of only 8 clamps, to be chosen according to which tooth is treated
